DGS Series (Filtered Short-Wave) Electric Infrared Heater

DGS Series heaters produce filtered short-wave infrared heat. A custom designed reflector helps create the intense heat output needed for a variety of outdoor applications. Constructed of aluminum, the DGS Series was built to handle harsh external conditions.

Features & Benefits

Custom Designed Parabolic Reflector

- Reflects 99% of rays directly towards the target.

Available in Three Wattages

- 1,500 W, 2,000 W, and 3,000 W

Rustproof Body Parts

- Extruded aluminum body.
- Longer lasting.
- IP55 Water Resistant for use in harsh conditions.

Instant Heat

- Able to heat up to 3,500°F in 2 seconds.

Suitable for Indoor/Outdoor Use

- High-end quality and compact, aesthetic design is ideal for cafes and restaurants.

Increased Lamp Life & Heat Sensitivity

- Cost effective.
- Can be used on high ceilings.

Weatherproof

- Heat is not affected by draughts, strong winds, or rain.

Universal Burning Position

- Works in all installation angles for ultimate versatility.

Specifications

Model Wattage Range:

- 1,500 W (5,118 BTU equivalent)
- 2,000 W (6,824 BTU equivalent)
- 3,000 W (10,236 BTU equivalent)

Dimensions:

- 21.06" x 4.61" x 4.84" (1,500 W and 2,000 W)
- 36.75" x 4.61" x 4.84" (3,000 W)

Weight:

- 5.7 lbs. (1,500 W and 2,000 W)
- 9.7 lbs. (3,000 W)

Mounting Heights:

- 7 to 9 ft. (1,500 W)
- 8 to 10 ft. (2,000 W and 3,000 W)

Voltage:

- 120VAC (1,500 W)
- 230VAC (2,000 W and 3,000 W)

Approvals & Certifications:

- Indoor & Outdoor Commercial
- Outdoor Residential

Limited Warranty: 1 Year (All Components)
