1 Specify natural (Nat.) or propane (Prop.) gas at time of order.
2 If the heater is mounted below 8 feet, protective guards (PG) are required. Typical or recommended mounting heights are provided as a guideline. Actual conditions may dictate variations from the above data.
3 Model requires LV3-5EA-SUB optional accessory package when installing in a ‘U’ configuration.
4 Always maintain clearance to combustibles. Use high BTU output when determining clearances. The minimum end clearance is 12 in. Place signs where necessary in accordance with ANSI/NFPA Standards. Clearances published in LS3 Series manual and on warning label supersede data shown on this brochure. Clearances posted above reflect those of a heater installed at a mounting angle of 0° from horizontal and without the use of add-on options.
5 Heaters mounted on an angle between 0° to 45° must maintain clearances posted for 0° or 45°; whichever is greater(not shown). See LS3 Series installation manual for additional information.
